# Monitor Student Writing Performance at Scale in Real Time

WriteVue

Write**Vue** employs the power of artificial intelligence to capture, analyze and assess student writing.

WriteVUE uses IntelliMetric® artificial intelligence to provide real-time data analytics to measure student writing proficiency, a critical component of a student's cognitive footprint. Capture the data needed to make accurate decisions to improve student learning, critical thinking skills, and writing proficiency.

Key Benefits

Capture
Immediately capture data aligned with writing proficiency and insights into the most common mistakes.

Analyze
Leverage patented AI technology to evaluate students' writing ability for benchmarking and instruction.

Visualize
Interactive charts provide visual, real-time writing analytics to improve student literacy.

Support
Literacy and Data Specialists available to ensure success.

Monitor Student Writing Performance at Scale in Real Time

WriteVue

Capture student writing data from any source

WriteVUE enables administrators to capture student writing from Vantage Learning proprietary platforms MYAccess! and IntelliWriter, or any platform your institution employs. Examples include Blackboard, Canvas, Google Docs, Microsoft Word, and more.

> "
> *This is a powerful tool. You are able to see a wealth of data and pinpoint areas that are commendable for your teachers and areas that may need additional focus and/or attention.*
> "

Lara Rowland, Director of Curriculum, Instruction & Assessment, Bleckley County, GA

> "
> *WriteVue is a game changer.*
